**QUESTIONS:**

Would you support decreasing state spending or at least stopping any increase in state spending?

Will you oppose any broad-based tax, such as an income tax, sales tax, or consumption tax, or any other effort to increase the overall tax burden on New Hampshire citizens?

Do you believe that educational funding should be resolved by the legislature and not the court?

Will you support openness and accountability in state government by establishing a system of management based upon goals, reviews and metrics for each government program and department, plus putting state spending records on-line for the public?
